Some tips from a straight-A student...

'I found using a timetable really helpful, especially closer to the exams when you have so many subjects to cover...It helps you to break up the subjects and you can pick a night to study a particular subject eg. History on a Wednesday...Also, if you know you have homework in one subject you can combine it with some extra study in this subject.'

'I try to get homework out of the way as soon as I come in from school, then go on to revision, possibly after dinner, depending on how much homework I have.'

'I try to keep all my books in one area for studying, rather than have them spread out all over the room.'

I can't study with music on, although I know some people think they can.

'I kept up all my sports throughout the year, and found that it really gave me a break and took my mind off things.'

Because most of my friends were also studying or doing homework at the same time, we didn't interrupt each other with telephone calls or texts.

I think the main thing is to get organised in advance of your exams and then you will be more relaxed when it comes to the actual Junior Certificate.
